

HTC Reveals Butterfly S

Written by Marco Attard
26. June 2013

HTC upgrades the 2012 Butterfly smartphone to HTC One standards with the Butterfly S-- a 5-inch flagship complete with 1920x1200 display, front-facing BoomSound Speakers and Sense 5 UI.

It runs Android 4.2.2 Jelly Bean on a quad-core 1.9GHz Snapdragon 600 processor (faster than the one inside the HTC One), quad-band HSPA/WCDMA radio, 2GB RAM, 16GB built-in storage (expandable via microSD) and 3200mAh battery.

As one expects the OS is skinned with the familiar HTC Sense UI.

The rear-facing camera features the UltraPixel and Zoe technologies first seen in the HTC One, while the front carries a 2.1MP wide-angle camera.

HTC says the Butterfly S will be available in "select Asia Pacific markets" from July 2013, but gives no word on availability in our side of the globe as yet.
