Samsung announces its next Windows Phone-powered handset-- the Omnia M (model GT-I8350), a smartphone aiming at the lower end of the market.

It has a 1GHz processor, 4" AMOLED display, 4GB of storage and 384MB of RAM, together with 5MP rear- and VGA front-facing cameras.

While the OS is Windows Phone 7.5, Samsung includes a number of extra software features-- AllShare, Music Hug, Family Story and the ChatON video calling service.

The Omnia M is soon available in European territories.
