SampleTank iOS

IK Multimedia's **SampleTank 1.1** for iOS is now available as a universal app for iPhone, iPod touch and iPad, through the iTunes App store. The update, for both regular and free versions, is available as a free download to existing users and also adds a 4-track MIDI recorder, a new beat-making interface, an expanded set of instruments and patterns, more compatibility with third party docks and much more.

SampleTank is **the first pro-quality, sample-based sound and groove workstation available for the iOS mobile platform**. It can be played directly from the app or can be used live with any MIDI keyboard or pad controller with the iRig MIDI interface adapter from IK Multimedia.

The SampleTank 1.1 update adds a 4-track MIDI recorder that enables the mobile musician to record beats, grooves or complete songs anytime and everywhere. The new recorder features quantize and loop functions, export to audio and integration with the built-in pattern player making SampleTank a full-featured mobile sound and groove workstation. Plus the new beat-making interface with assignable pads makes groove creation a breeze.

The impressive number of sounds and patterns has grown even further with this update. The number of included instruments has doubled in the regular version and now exceeds 500 total available instruments. SampleTank now also includes over 1000 professionally programmed patterns so that anyone can make music regardless of prior musical ability. Instruments and patterns are organized into 16 categories including Pianos, Organs, Strings, Basses, Guitars, Drums, Synths, Woodwinds, Brass, Ethnic Instruments, Percussion and more all instantly accessible from a single app to create any style of music.

Additionally SampleTank 1.1 update also adds increased compatibility with third party iOS docks and accessories plus many more new features.

SampleTank 1.1 is a universal app for iPhone/iPod touch/iPad and is now available on the iTunes App store for only \$19.99/€15.99 with 136 high-quality instruments and over 1,000 patterns included.

A **free version of SampleTank** is also available with 8 sounds plus their selection of patterns. An additional 22 expansion sound packs are available for in-app purchase starting from as low as \$4.99/€3.99 each or all together for a competitive bundle price. Owners of iRig MIDI will also get an exclusive sound set of 48 sounds for free simply by registering. The 1.1 update is free to existing users.
