Lenovo announces an IdeaPad tablet with an alternative to Android, for customers who won't do Google-- the Windows 7 carrying IdeaPad Tablet P1.

Powering the Windows tablet is a 1.5Ghz Intel processor and a 10.1" 1280 x 800 capacitative touchscreen.

Providing storage is up to 2GB DDR2 memory, together with up to 64GB of SSD storage.

Connections come via Bluetooth, 3G, wifi, USB and Micro SD. It also carries a 2 megapixel camera on its front, while the touchscreen supports stylus input.

Lenovo says the battery provides 6 hours of usage.

The IdeaPad P1 should be available in Q4 2011, in either silver-gray or orange.
