Leading the vendor rankings is Samsung with sales reaching 85m, a 19.3% Y-o-Y increase. The Galaxy S8, S8+ and Note 8 models are main sales drivers, helping the Korean compete against Chinese manufactures. The double-digit growth is the first since Q4 2015.

Meanwhile Q3 2017 Apple sales are up by 5.7%, the result of a return to growth in China and "strong" sales of legacy iPhones (such as the iPhone 5S) in India and other emerging markets. Xiaomi follows with the strongest growth (80% Y-o-Y) through international markets, including Russia, India and Latin America.

In 4th and 5th place are two other Chinese vendors, Oppo and Xiaomi, who along with other companies from the country continue to drive sales across emerging markets with midtier and budget devices offering 4G connectivity and better cameras.

"The arrival of Apple's new flagship iPhones at the end of Q3 2017 has delayed smartphone purchases into Q4 2017," Gartner concludes. "Following compelling offers on Black Friday and Cyber Monday, the holiday season will likely boost sales of smartphones before the end of the year. We estimate the Q4 smartphone sales will boost total sales for the full year. We expect smartphone sales will reach 1.57 billion units in 2017."
