Mobile TeleSystems" (MTS), the largest mobile operator in Russia with more than 107 million mobile subscribers, launches **VideoMost** cloud videoconferencing service targeting its enterprise users.

VideoMost® videoconferencing service is available as part of the MTS **Lite Office** cloud platform (a marketplace of cloud SaaS applications for businesses) and supports up to 50 users in online meeting room.

The new service, based on **SPIRIT DSP software engine**, runs in all popular web browsers and mobile devices and has affordable pricing models starting from $10 per month.
