LifeSize® Connections™

Everyone wants videoconferencing products to integrate desktop applications like Skype, iChat and GoogleTalk into high-end VTC systems-- especially HD ones. This would allow everyone to be able to jump on a VTC network anywhere at any time-- even if you don't have a high-end VTC system.

Well, those days are coming and in the meantime, companies like Cisco, Polycom and now Logitech with LifeSize are offering a patch-like solution by making their networks available via mobile devices like iPads and mobile phones via the Cloud.

Dubbed **LifeSize Connections**, it's an HD video collaboration platform that uses the cloud to connect compatible VTC's available to devices (phones, laptops and iPads) via a \$1000 box.

OK, so how? Well, first of all, they bought Mirial, so they've integrated their mobile connectivity technology into the LifeSize Cloud.
