

LifeProof Intros NUUD for iPhone 7

Written by Marco Attard
27. January 2017

LifeProof announces iPhone 7 and iPhone 7 Plus versions of the NUUD-- a case the company says is a slimmer option for customers wanting to protect their device from water, snow, dirt and drops.

All NUUD cases feature an uncovered screen for direct display access "while adding minimal size and weight to the phone." The case also provides access to all iPhone 7/7 Plus features, a transparent back allows one to show off the smartphone and enhanced audio promises crystal clear sound even when the case is on.

A redesigned camera cover promises to collect less dust, thus eliminating worries of lens field disruption.

The NUUD case is available now in black, teal, blue and purple colours.
