Stockholm-based Yevo Labs announces the 2nd generation Yevo Air wireless earbuds-- a followup to the Yevo 1 Bluetooth earbuds the company promises make a more comfortable alternative to the Apple AirPods.

The Yevo Air feature a lightweight design complete with replaceable silicon tips, with multiple size tips allowing customers to choose the best fit. Connectivity comes through Bluetooth 4.2, while 6mm drivers and optimised EQ offer "consistent" sound. A built-in microphone handles call taking duties, with multi-function buttons controlling calls, music and smart assistant such as Siri and Google Assistant.

Construction is sweat and splash resistant, meaning users can wear the earbuds even at the gym. Battery life reaches up to 3.5 hours on a single charge, and up to 14 hours together with the included charging/storage case. A full charge takes 1.5 hours, but a quick 15-minute charge adds 45 minutes of use.

The Yevo Air are available now in two colours, black or white.
